I'm not familiar with the brand but if you're wanting to try something new [Dr Roebuck's Skincare](#) launched on Sephora recently, I've already popped a few of their items into my cart as I was intrigued with the raving about how great it is for drier, sensitive skin. I'm dry and I tend to get a bit more sensitive in the Winter (or at least I did last year) so, I thought I'd give this brand a try out.
